

Quality Data from Dun & Bradstreet

Driving Data Integrity Through Advanced Technology and Proven Experience

QUALITY. DEPTH. VOLUME.

For more than 175 years, we've been passionate about what the power of data can do to help businesses grow.

To get the most out of your sales and marketing efforts, you need the insight, direction and confidence that only comes with clean, actionable data — that's where Dun & Bradstreet comes in.

DUNSRight™

D&B gathers data from 30,000+ discrete sources across the globe. Through our DUNSRight™ process, we collect, aggregate, edit, and verify data from thousands of sources daily.

The foundation of DUNSRight™ is Quality Assurance that includes more than 2,000 separate automated checks — plus many manual ones — to ensure the data meets our high quality standards. In addition, five quality drivers work sequentially to collect and enhance the data, including entity matching and corporate linkages:

ABOUT DUN & BRADSTREET

Dun & Bradstreet (NYSE: DNB) grows the most valuable relationships in business. By uncovering truth and meaning from data, we connect customers with the prospects, suppliers, clients and partners that matter most, and have since 1841. Nearly ninety percent of the Fortune 500, and companies of every size around the world, rely on our data, insights and analytics. For more about Dun & Bradstreet, visit DNB.co.uk. In the UK Dun & Bradstreet Limited is authorised and regulated by the Financial Conduct Authority

CLENESTEP™

We source millions of new contact records annually through four primary sources: crowd, source, third-party, and royalty based. Before they make into the D&B database, we run them through CleneStep™ — our proprietary 3-dimensional data validation and cleansing and enrichment process — to ensure phones connect and email addresses are valid, accurate, and have minimized deliverability risk. Only 8% of those records — or about 10M — meet our high quality standards. We reconfirm email deliverability every 60 days and phone connectability every 180 days (90 days for high demand records, which is approximately 33%). This is all part of our data commitment to our customers.

Our data optimization processes ensures truth and value in your data as well. We leverage our database of more than 300M companies, more than 100M contacts, and more than 300M cookies to ensure your data is accurate and complete. We provide D&B D-U-N-S® numbers —the universal, unique identifying system for all companies doing business in the U.S. — to enable data alignment and enrichment across your marketing platforms. We also provide data on more than 6,600 installed technologies.

The data and data management practices from Dun & Bradstreet enable you to optimize your data and align your sales and marketing efforts to focus on the most valuable relationships, including the companies and decision-makers that best fit your solutions.
