

Buydex

Segment Customers and Prospects Based on Their Spending Capacity

Buydex is a fact-based, data-driven model that classifies your customers and prospects based on their overall spending capacity. It refines your target market segmentation beyond traditional methods such as sales, employees, and industry.

More specifically, Buydex is a spend-ranking tool developed by Dun & Bradstreet (D&B) to rank businesses on a scale of 0-99. Scores 0-24 represent lowest spending businesses (50% of the entire business population) while companies with scores 25-99 represent highest spending entities.

Buydex uses D&B's proprietary Detailed Trade data as a proxy for ascertaining spend amounts and leverages our other data assets to model spending capacity of businesses worldwide.

A circular icon containing four small squares arranged in a 2x2 grid.

MODEL VARIATIONS

The Buydex model is global in scope and is available in several versions:

STANDARD – ranks business establishments based on their overall spending capacity. The model can assess each location individually as well as the entire corporate family as a whole.

INDUSTRY SPECIFIC – ranks businesses based on spend within a specific industry. For example, spending on IT, Transportation, Trucking, Less-Than-Truck Load, Food & Beverage, and Communications. Other industry-specific Buydex models are available upon request.

CUSTOM – ranks business's spending capacity on specific customer products and services (customer-provided product usage history is an input into the Custom Buydex).

D&B ADVANCED ANALYTICS PORTFOLIO:

To optimize sales effectiveness and achieve intelligent targeting, our customers rely on the following D&B solutions using them separately or in conjunction with each other:

BUDGET: Buydex analyses a business establishment's overall Spend Capacity.

AUTHORITY: Decision HQ assesses business site's Decision Making Power.

NEED: Industry-Specific Buydex and **Propensity Models** evaluate an enterprise's needs for products and services. **Material Change** anticipates that need growing.

USE CASES AND VALUE PROPOSITION

The model is used as a stand-alone solution or combined with the traditional approaches. For example, as shown below, Buydex could be added as another dimension in Sales or Employee segmentation further improving the granularity and accuracy of these time proven methodologies.

		SPENDING CAPACITY (IN \$)			
SALES (IN \$)		< 10K	10K-100K	>100K	Total
	< 1M	55%	41%	4%	100%
	1M-10M	34%	40%	26%	100%
	> 10M	11%	19%	70%	100%

There are pockets of small size businesses with higher levels of spend capacity

High annual sales does not always mean large opportunity
